Macroprolactin, S

Prolactin, Total, S

10.0 ng/mL

MCR
Reference Value
4.0–15.2

Prolactin, Unprecipitated, S

6.0 ng/mL

MCR
Reference Value
2.7–13.1

Percent

40.0 %

MCR
Reference Value
≤60

Comment
MCR

Total prolactin and unprecipitated prolactin are within the age/gender stratified reference interval. 60% or less of serum prolactin precipitated following incubation with polyethylene glycol (PEG). Results are not consistent with the presence of macroprolactin. These results should be interpreted in the context of patient presentation and other clinical findings. Prolactin was measured using the Roche Cobas e immunoassay analyzer.
