

Overview**Profile Information**

Test Id	Reporting Name	Available Separately	Always Performed
F5MET	5-Methyltetrahydrofolate	Yes, (order F5M)	Yes
FNTM	Neurotransmitter Metabolites/Amines	Yes, (order FNEU)	Yes
FFTHB	Tetrahydrobiopterin/Neopterin	Yes, (order FFTEN)	Yes

Method Name

High Performance Liquid Chromatography-Electrochemistry & Fluorescences

NY State Available

Yes

Specimen**Specimen Type**

CSF

Specimen Required

Medical Neurogenetics collection kit (MCL Supply T657) required.

Each collection kit contains 5 microcentrifuge tubes.

COLLECTION PROTOCOL:

1) CSF should be collected from the first drop into the tubes in the numbered order. Fill each tube to the marked line with the required volumes.

Tube 1: 0.5 mL

Tube 2: 1.0 mL

Tube 3: 1.0 mL (contains antioxidants necessary to protect the same integrity)

Tube 4: 1.0 mL

Tube 5: 1.0 mL

-If samples not blood contaminated, the tubes should be placed on dry ice at bedside.

-If samples are blood contaminated, the tubes should immediately be centrifuged (prior to freezing) and the clear CSF transferred to new similarly labeled tubes, then frozen.

-Store samples at -80 until they can be shipped.

2) Complete Medical Neurogenetics, LLC request form, marking the following three tests: Neurotransmitter Metabolites, Tetrahydrobiopterin and 5-Methyltetrahydrofolate. Also include sample date and date of birth.

3) Label tubes with patient name and ID number, leaving the tube number viewable.

4) Place samples inside the specimen transport bag and the Medical Neurogenetics, LLC request form inside the pouch of the transport bag.

5) Ship samples frozen on dry ice.

Reject Due To

Specimens other than	CSF in special collection kit (MCL supply T657)
Anticoagulants other than	NA
Hemolysis	NA
Lipemia	NA
Icteric	NA

Specimen Stability Information
