

Beta-2 Glycoprotein 1 Antibodies, IgG and IgM, Serum

Test ID: B2GMG

Explanation: On the effective date the reported units will be updated as noted below.

Current Reference Values
<p><15.0 U/mL (negative) 15.0-39.9 U/mL (weakly positive) 40.0-79.9 U/mL (positive) > or =80.0 U/mL (strongly positive) Results are expressed in arbitrary units and apply to IgG and IgM values. Reference values apply to all ages.</p>

New Reference Values
<p>BETA 2 GLYCOPROTEIN 1 (GP1) ANTIBODIES IgG: <15.0 SGU (negative) 15.0-39.9 SGU (weakly positive) 40.0-79.9 SGU (positive) > or = 80.0 SGU (strongly positive) Results are reported in standard IgG anti-beta 2 GP1 units (SGU). Reference values apply to all ages.</p> <p>BETA 2 GLYCOPROTEIN 1 ANTIBODIES IgM: <15.0 SMU (negative) 15.0-39.9 SMU (weakly positive) 40.0-79.9 SMU (positive) > or = 80.0 SMU (strongly positive) Results are reported in standard IgM anti-beta 2 GP1 units (SMU). Reference values apply to all ages.</p>
