

Hematopathology Consultation, MCL Embed

Test ID: HPWET

Explanation: A Hematology Oncology clinical note and clinical indication is now required to ensure all necessary information is included to accurately provide a primary diagnosis, and to reduce turnaround time.

Current Necessary Information	New Necessary Information
<p>The following information is required:</p> <p>1. All requisitions must be labeled with:</p> <ul style="list-style-type: none">-Patient name, date of birth, and medical record number-Name and phone number of the referring pathologist or ordering physician-Collection date <p>2. All specimens must be labeled with:</p> <ul style="list-style-type: none">-Two patient identifiers (first and last name, date of birth, or medical record number)-Specimen type <p>3. All specimens (bone marrow core biopsy, bone marrow aspirate clot, bone marrow aspirate, peripheral blood smears, and bone marrow aspirate slides), patient history, and requests must be clearly labeled with correct patient information and case number.</p> <p>4. A brief history (recent clinical note is preferred), patient information, and recent complete blood cell count results (within 14 days of bone marrow specimen) are required. A complete pathology report is not expected. Hematopathology Patient Information (T676) may be used to provide patient information. Send with the specimens.</p> <p>5. All pending and final reports for ancillary testing on above specimens.</p>	<p>The following information is required:</p> <p>1.
