

***MLH1* Immunostain, Technical Component Only**

Test ID: MLH1

Explanation:

Ordering guidance has been updated to help prevent mis-ordering between MLH1 and ML1HM:

MLH1 includes only technical performance of the stain (no pathologist interpretation is performed). This test can be ordered to help identify the responsible gene in DNA mismatch repair (MMR) within the tumor tissue.

For testing to help distinguish between a sporadic and germline etiology, order ML1HM / MLH1 Hypermethylation Analysis, Tumor. <https://www.mayocliniclabs.com/test-catalog/overview/35494>

Note:

Testing will proceed and be billed as ordered.
