

Paraneoplastic, Autoantibody Evaluation, Serum

Test ID: PAVAL

Explanation:

Due to supply chain issues component VGKC (Neuronal (V-G) K+ Channel Ab, S) is not being performed. It will be reported as test not performed (TNP), removed from profile interpretations, and the CPT code will not be passed on invoices. We anticipate the duration of this issue to be >30 days.

Note:

PAVAL (Paraneoplastic, Autoantibody Evaluation, Serum) is not our recommended test for patients suspected of autoimmune neurological disorders. A comprehensive neurological phenotype-specific autoimmune/paraneoplastic evaluation (e.g. encephalopathy, movement disorders, myelopathy, axonal neuropathy, etc.) should be considered. Please consult our [Neurology specialty website](#) for more information on this evolution in laboratory testing.

Recommended Alternative Test:

Encephalopathy, Autoimmune/Paraneoplastic Evaluation, Serum

Test ID: ENS2
