

Amphetamines Confirmation, Random, Urine

Test ID: AMPHU

Explanation:

Due to instrumentation issues, test results for AMPHU will be extended 3 to 5 days beyond currently published turnaround times. The duration of this delay is anticipated to be approximately 2 to 4 weeks. An update will be provided when normal testing patterns resume.

Note:

AMPHU (Amphetamines Confirmation, Random, Urine) is not our preferred test to determine compliance or illicit stimulant drug use. Quicker, more comprehensive qualitative high-resolution accurate mass spectrometry testing is available as a suggested alternative. Please consult our [Therapeutics specialty website](#) for more information on this evolution in laboratory testing.

Recommended Alternative Test:

Targeted Stimulant Screen, Random, Urine

Test ID: TSPU
